DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 18 August 2006 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tai et al (U.S. Patent 5,667,743 A) in combination with Matsui et al (U.S. Patent 4,842,796 A).

Note that U.S. Patent 5,667,743 A (cited by applicant) is equivalent to EP 0808922 A1 (also cited by applicant).

Art Unit: 1732

Tai et al (see the entire document, in particular, col. 3, line 7 to col. 8, line 26; Examples) teaches a process of wet spinning a meta-aramid polymer as set forth in the instant claims, except that Tai et al does not explicitly teach two drawing steps, which is taught by Matsui et al (see the entire document, in particular, col. 1, lines 11-18 and 53-58; col. 2, lines 6-33) and such would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of Tai et al in view of Matsui et al principally in order to manufacture fiber having a high tensile strength.

Response to Arguments

4. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.
